

Elevators provide a logical solution to fast, safe and reliable vertical access during maintenance outages, turnarounds, unit upgrades and new construction projects. McDonough is the industry leader in providing rental rack and pinion elevators for industrial usage.

TEMPORARY ELEVATORS

- Transport personnel, tools, and supplies
- Creates a safer work environment
- Increases employee and contractor efficiency
- Improves productivity
- Improves morale
- Saves time
- Saves money

From power generation to the petrochemical and refining industries, our customers confirm temporary elevators used to move personnel and materials before, during and after major maintenance and construction projects makes good fiscal sense. Projects completed safer and more efficiently can get you back in production sooner.

STANDBY SERVICE

- Elevator service technician on location for existing permanent rack & pinion elevators utilized during outages and turnarounds
- Reduces downtime if the elevator encounters an issue
- Extra preventative maintenance throughout the project to help prevent breakdowns
- Prior to start of project, consider purchasing key elevator replacement parts to have on hand
- Saves time and money

ELEVATOR OPERATORS

- Helps reduce elevator damage by contractors
- Elevator operated correctly, efficiently, and safely to minimize downtime

How many days can you shave off your project by utilizing a rental elevator or stand-by service? Let us run the numbers for you.
