# McDONOUGH CONSTRUCTION RENTALS

At McDonough we offer a variety of rental equipment to meet your job site's vertical access needs. Our extensive fleet of construction hoists, transport platforms, personnel manlifts, and mast climbers is strategically positioned in Anaheim, Atlanta, Baltimore, Houston, and Tampa to service projects across the United States. Our turnkey rental services will ensure that your project runs smoothly from start to finish.

## TURNKEY RENTAL SERVICES

- Layout Drawings
- Installation
- Dismantle
- Preventative Maintenance
- Permitting
- Equipment Inspections
- Job Site Consultation
- Loading Docks
- Operators
- Standby Technicians
- Common Tower

## CONSTRUCTION HOISTS

Whether you call it construction hoist, construction lift, buck hoist, or temporary elevator, McDonough has the equipment to meet your project needs.

Our rental fleet is comprised of Stros and Champion brand construction hoists, including a variety of sizes and capacities for both commercial and industrial applications. We offer turnkey rental services including construction hoist rental installation, dismantle, operator training, and preventative maintenance.

## ADDITIONAL OFFERINGS

- Loading Dock/Base Platform and Stairs
- Erection, Jump and Dismantle Cranes
- Hoist Operators and Standby Technicians
- Common Tower and Runback Structures
- P.E. Stamped Drawings
- Hazardous Area Compliant Equipment

## TOWER CRANES

McDonough is delivering cutting-edge equipment. Simple, rapid set-up, and high-performing self-erecting cranes are the newest addition to McDonough's fleet of equipment rentals. Ideal for small construction sites and tight areas, these cost and time-saving self-erecting tower crane rentals are sure to transform every aspect of the building process.

## TRANSPORT PLATFORMS

Our transport platforms are a great alternative when traditional construction hoists don't fit your project requirements. The transport platform is designed to move men and materials up and down your building in a similar fashion to a construction hoist, but it has a smaller footprint and is rated for lower lifting capacities (up to 4,400 lbs.). This reduces the loads on the building, which can be beneficial when tying into scaffolding or wood frame buildings. Transport platforms can also be more cost effective, because the installation and dismantle are less labor intensive and don't require the use of a crane.

All of our transport platforms are ANSI A92.10 compliant.

## COMMON TOWERS

A common tower, also known as a run-back or set-back tower, is a customizable temporary structure designed to support up to three dual car hoists. It eliminates the need for tie-in connections directly into the building structure, reducing costs and closing time. The tower can be tied into the building with minimal impact on the curtain wall or window leave-outs. Using a common tower can reduce the landing space needed for hoist cars from 15 feet to 6 feet, maximizing hoisting and minimizing schedule impact. The tower can be built on the ground in pod sections or erected piece by piece as the building grows.

# McDONOUGH ELEVATOR

At McDonough, we are committed to keeping your Rack and Pinion elevators running safely and reliably. Over 45 years of industry experience has given us the expertise to service all brands of rack and pinion elevators including Stros, Pega, Geda, and Alimak models. We offer a variety of parts, preventative maintenance, repair services, outage support, elevator refurbishments, and modernizations. Schedule an elevator consultation today so we can visit your site and develop a customized solution for your Rack and Pinion elevators.

## RACK AND PINION ELEVATORS

McDonough owns and operates one of the largest and most geographically dispersed rental fleets of personnel and material hoists in the United States. Our fleet of more than 200 new and refurbished units are equipped with the latest available technology on the market to ensure safe and reliable operation. With top quality field technicians, we offer installation of McDonough or customer owned equipment, outage support, stand by technicians and trained hoist operators.

## MODERNIZATION & REFURBISHMENT

A refurbished rack and pinion elevator is a cost-effective alternative to buying new equipment. McDonough can refurbish any rack and pinion elevator, whether operated as a permanently installed elevator or temporary construction elevator, often saving customers up to 30% on the cost of new equipment. Additionally, lead time for a refurbished rack and pinion elevator are typically far less than those for a new elevator system.

## PARTS

An elevator that is broken down and waiting on parts to arrive from the OEM is frustrating for people that depend on that equipment to safely perform their job. At McDonough Elevators, a leading provider of spare parts for elevators, we understand the importance of keeping your elevators working properly and reliably. Therefore, we stock over \$2MM dollars in key spare parts throughout the country to keep the equipment downtime to a minimum. Whether it is a breakdown situation or a planned parts replacement, McDonough has what you need to keep your elevators running at optimal efficiency.

McDonough stocks OEM and 3rd party spare parts for elevators for STROS, Alimak, Pega, GEDA, and other equipment manufacturers that are available for immediate shipment. Contact us for pricing, shipping options, and availability for all of your rack and pinion parts needs. Contact us today to find out more about our industrial elevators parts.

## VERSATILE RENTAL FLEET

As a licensed elevator contractor, McDonough offers maintenance and repair services on all brands of rack and pinion elevators, including Stros, Pega, Geda, USA Hoist, and Alimak. We focus on quality, efficiency, and safety – regardless of the manufacturer. Our qualified service technicians follow a 50-point preventative maintenance checklist on every elevator inspection. We are committed to ensuring customer satisfaction by delivering timely responses to service calls and giving regular equipment performance reviews.

## WHY McDONOUGH?

**ELEVATING PROJECT SUCCESS** For over 40 years, McDonough has been elevating project success for commercial construction projects and industrial facilities. Our best-in-class customer and technical service provide the foundation for the rental and sales of vertical solutions – construction elevators, self-erect tower cranes, and material transport platforms. Serving the entire United States from locations in Houston, Anaheim, Baltimore, Atlanta, and Tampa, we are prepared to service projects across the country.

We understand the value of safety and time on your jobsite. Every day your unit is shut down you are losing money and productivity. That's why we prioritize safety training, equipment reliability, and servicing your projects.

WE ARE  
**ONE**  
McDONOUGH

- ONE TEAM WORKING TOGETHER
- ONE BELIEF TO KEEP PROMISES AND DO THE RIGHT THING
- ONE GOAL TO DELIVER EXCEPTIONABLE SERVICE TO OUR CUSTOMERS
- ONE COMPANY WHERE LONG TERM RELATIONSHIPS ARE BUILT ON TRUST AND EXPERTISE
