

TOP 10 BENEFITS OF TRANSPORT PLATFORMS

- 1** Doesn't require a crane
- 2** Doesn't require a loading dock
- 3** The loads it puts on the structure are generally much lower than a traditional man and material hoist.
- 4** Can be operated from inside the cab or from the ground.
- 5** Great alternative to using the interior elevator to stock a building with finishes and appliances.
- 6** Can be erected and dismantled with a forklift
- 7** Requires less amperage than a man and material hoist
- 8** Smaller footprint than traditional hoist
- 9** Rated for lower lifting capacities beneficial for scaffolding or wood frame buildings (up to 4,000 lbs.)
- 10** More cost effective due to less labor-intensive installation and dismantle, and no need for a crane or loading dock
